Make the summer rush easy  
while **maximising your profits!**

Summer brings one thing to mind for business owners: the peak season! At Sammic, our suppliers have been perfecting juicers for 70 years, making the summer rush a breeze. We understand that every business has unique demands and needs, and we firmly believe in the power of choice because one unit doesn't fit all. While you may think a centrifugal juicer is all you need, you may need to realise the impact the extractor can have on the final product (the juice itself) and operational costs.

If you want to offer the best quality juices and maximise your output, you need a citrus juicer for citrus and a centrifugal juicer for non-citrus items. That's why we offer two distinct ranges of juicers designed to help you meet the demands of summer while maximising your profits.

Let us guide you through the differences between citrus and centrifugal juicers. Click or scan the QR code to find the right juicer for you!

Citrus juicers are engineered to extract the maximum amount of juice from citrus fruits without removing the skins.

This not only saves on labour but also reduces waste and prevents the citrus from drying out.

## Get extra 42% juice

with a Citrus juicer instead of a Centrifugal juicer!

*Citrus Juicer*

*Centrifugal juicer with clean basket*

*Centrifugal juicer with fibrous pulp in basket*

## ◆ Citrus Juicer Range

*Ideal for juice bars*

*Produces 140 litres per hour of Non-Citrus (Mixed Juice)*

*14.77 glasses needed to be sold per week to payback\**

\* Based on 12 months or 52 weeks turnover

## Citrus juicer vs Centrifugal juicer

If your venue primarily produces citrus juices like orange juice or citrus-based cocktails, we strongly recommend that you consider a citrus juicer over a centrifugal one. Here's why!

No split juice

Using Citrus Juicer

Using Centrifugal Juicer

Juicy oranges mean more juice! No more dry oranges! Just cut them in half.

## How do you prepare your oranges for juicing?

Did you know that using a citrus juicer eliminates the need for peeling!

Maximum Extraction  
and Less Waste

Less labour: No need  
peel the oranges.

Dishwasher safe  
components\*

\*Only removable  
accessories, not  
the whole unit.
